

AI POWERED NUTRITION ANALYSER FOR FITNESS

ENTHUSIASTS

1. INTRODUCTION

1.1 PROJECT OVERVIEW

- ❖ Food is a necessity for human life and has been addressed in numerous medical conventions .
- ❖ Modern dietary assessment and nutrition analysis tools give people additional possibilities to explore nutrition patterns, comprehend their daily eating habits, and keep up a balanced diet.
- ❖ Finding out a food's/fruit's nutritional value is done through nutritional analysis.
- ❖ Information about the chemical composition, processing, quality assurance, and contamination of food is a vital part of analytical chemistry.

1.2. PURPOSE

- ❖ The main aim of the project is to build a model which is used for classifying the fruit depends on the different characteristics like colour, shape, texture etc.
- ❖ Here the user can capture the images of different fruits and then the image will be sent the trained model.
- ❖ The model analyses the image and detect the nutrition based on the fruits like (Sugar, Fibre, Protein, Calories, etc.).

2. LITERATURE SURVEY

2.1 EXISTING PROBLEM

- ❖ As the importance of consuming nutritious foods has grown, new dietary assessment and nutrition analysis tools provide additional chances for people to understand their daily eating habits, explore nutrition trends, and maintain a balanced diet.

2.2 REFERENCES

2.3 PROBLEM STATEMENT DEFINITION

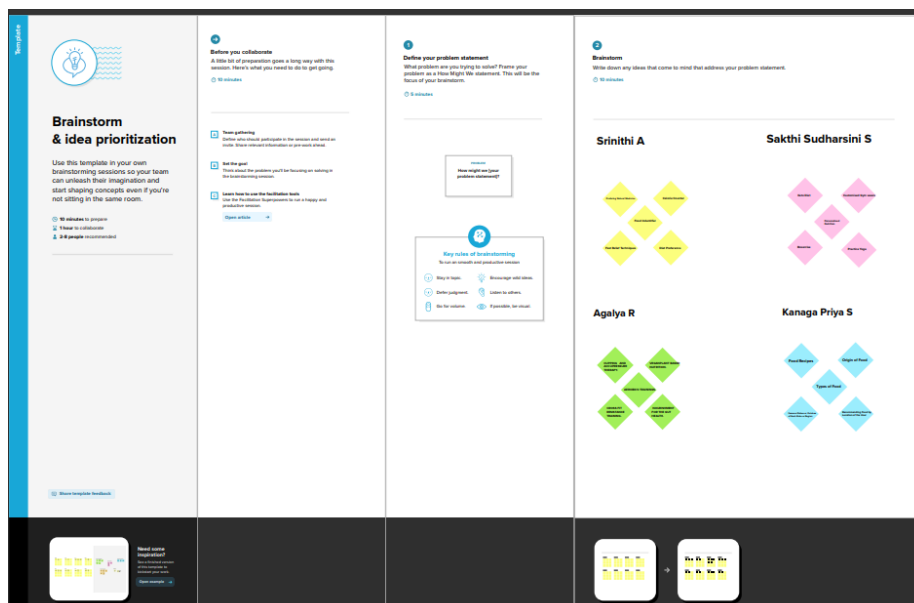

- ❖ Humans find it challenging to eat healthily because of their hectic lifestyles.
- ❖ Sometimes they are unable to determine if the fruits are developed enough to eat or not, and in those moments of need, they want to consume the healthiest fruit possible.

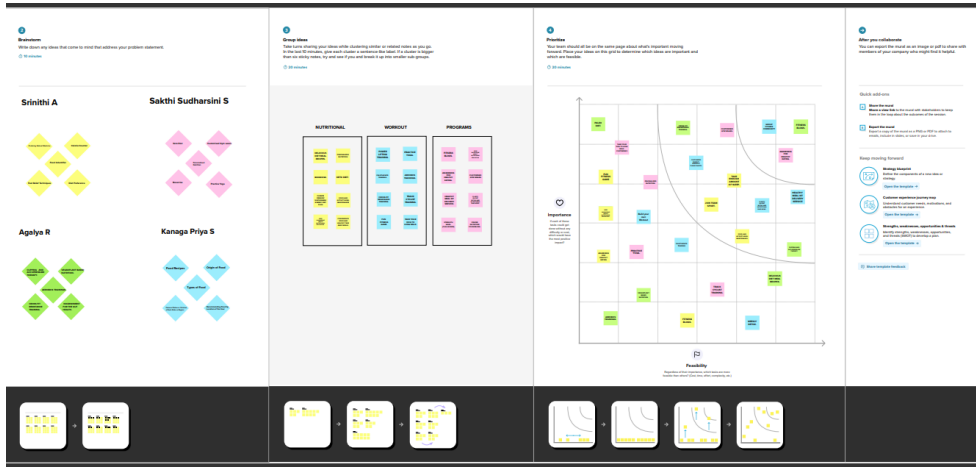

3. IDEATION AND PROPOSED SOLUTION

3.1 EMPATHY MAP CANVAS

3.2 IDEATION AND BRAIN STORMING

3.3 PROPOSED SOLUTION

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	A regular person must use cutting-edge AI- based analysing software to identify fruits and vegetables based on colour, texture, form, and other characteristics. At the time of identification, the user must also be aware of the nutritional content of that specific edible.
2.	Idea / Solution description	<p>Main Solution:</p> <ul style="list-style-type: none"> ● Clear and proper identification of the given input data. ● Provide nutritional facts based on the obtained data. ● Fitness analysis and maintenance as per the user's body conditions <p>Additional benefits:</p> <ul style="list-style-type: none"> ● Analysis of daily dietary requirements ● Daily tracking of dietary consumption thoroughly.
3.	Novelty / Uniqueness	<ul style="list-style-type: none"> ● The availability of fitness plans with addon bonuses ● Suggestion of home remedies and simple solutions for basic problems. ● An individualized food plan based on health condition and deficiency. ● Allowing for diet flexibility helps promote a healthy and effective eating pattern
4.	Social Impact / Customer Satisfaction	<ul style="list-style-type: none"> ● Healthy lifestyle development ● Constant calorie management monitoring results in a fitness mindset.

5.	Business Model (Revenue Model)	<ul style="list-style-type: none"> • Consultation with nearest trainers and nutritionist for personalized plans.
		<ul style="list-style-type: none"> • Adopt a specialized diet plan under the direction of an expert. • Advertise and offer nutritional supplements and fitness gear. • Promotion for fitness centers and hospitals.
6.	Scalability of the Solution	<ul style="list-style-type: none"> • Improving accuracy by expanding the data collection using user input data • Storage requirements of a specific food. • User friendly UI for everyone to use and get benefit from it.

3.4 PROBLEM SOLUTION FIT

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS People who wish to stay fit and live a healthy lifestyle.	6. CUSTOMER CONSTRAINTS CC Our customers are unable to access our solution due to network issues and network faults, since there are no other limits because our solution is an application.	5. AVAILABLE SOLUTIONS AS Exercise is an existing solution. Aerobics and Yoga Pros: The aim is to develop fitness habits that lead to long-term lifestyle changes and long-term improvements in health and well-being. Cons: Time consumption is increased, and there are no adequate instructions based on the user's health situation.
	2. JOBS-TO-BE-DONE / PROBLEMS J&P We provide nutritional information about the foods they eat on a daily basis. Thereby providing fitness to the masses and assisting them in staying healthy.	9. PROBLEM ROOT CAUSE RC The main cause of this problem is a lack of nutrition. Improper nutrition and a lack of regular exercise create a number of diseases, making it difficult to live a healthy life.	7. BEHAVIOUR BE Customers that have health care, dietary, or fitness concerns will be listed in the chatbox. When you first log in. Customers contribute information about their health state. A solution will be provided after an analysis of the customer's situation.
Identify strong TR & EM	3. TRIGGERS TR The customer will be driven to utilise our application after continual advertising of our application and hearing feedback from their friends and neighbours.	10. YOUR SOLUTION SL Calories tracking is a key component in all fitness programmes that aids in illness prevention, so regular people can utilise it. The instructor displays the specific fruits calories and offers guided guidance so that the users may execute them correctly.	8. CHANNELS OF BEHAVIOUR CH 8.1 ONLINE The programme is accessed by scanning the fruit and providing nutritional information.
	4. EMOTIONS: BEFORE / AFTER EM Customers would experience insecurity and poor health prior to using our application. Customers that use our application report improved health and increased self-motivation.		8.2 OFFLINE The user will perform physical activities based on the nutritional information.

4. REQUIREMETN ANALYSIS

4.1 FUNCTIONAL REQUIREMENTS

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Give permission to enter dashboard	Having your details Healthy tips Common food review
FR-4	Diet plans	Mediterranean diet Low-carbohydrates diet High protein diet Diabetic diet
FR-5	Features of subscription	Individual guidance Individual food shedule Chat with mentor
FR-6	Notification	Notify a healthy quotes daily Notify to drink water Notify right time for right food

4.2 NON-FUNCTIONAL REQUIREMENTS

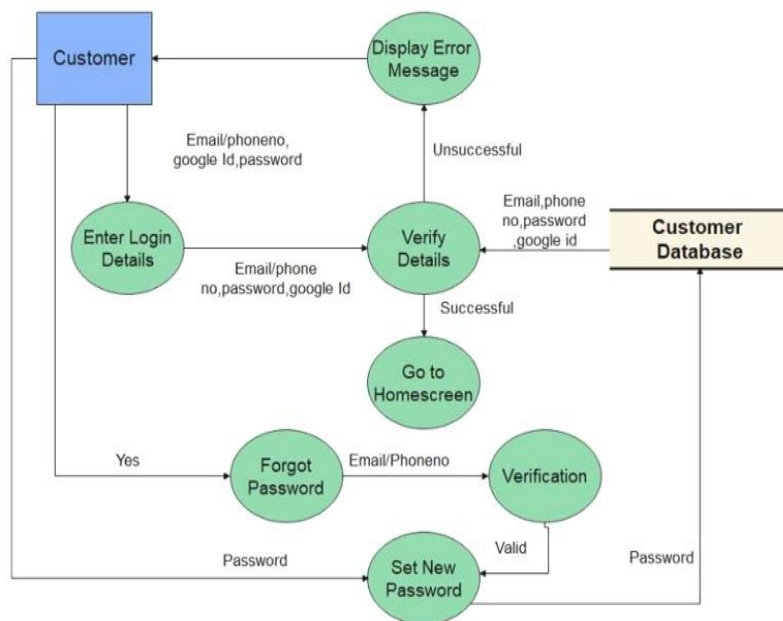

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	As usability is a prerequisite for success of health and wellness through mobile app make use by clients
NFR-2	Security	By using login page, verify through email and phone number by sending OTP
NFR-3	Reliability	Awareness and emphasis on the importance of sustaining personal health care and manage their health

		pervasively
NFR-4	Performance	Information was saved clearly and having a proper icons
NFR-5	Availability	Having proper internet this application will work any time
NFR-6	Scalability	If the client wants a seprate chart or modify the food chart they will proceed to deliver the opinion

5. PROJECT DESIGN

5.1 DATA FLOW DIAGRAMS

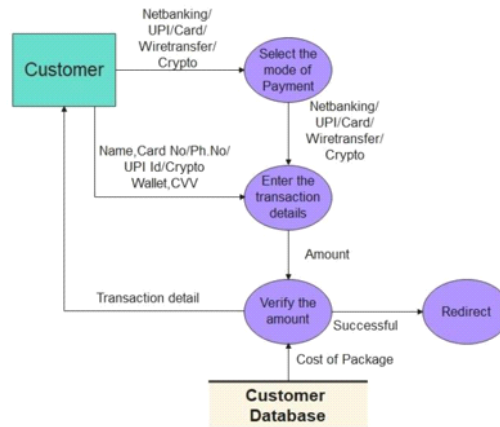

DFD-1(Login):

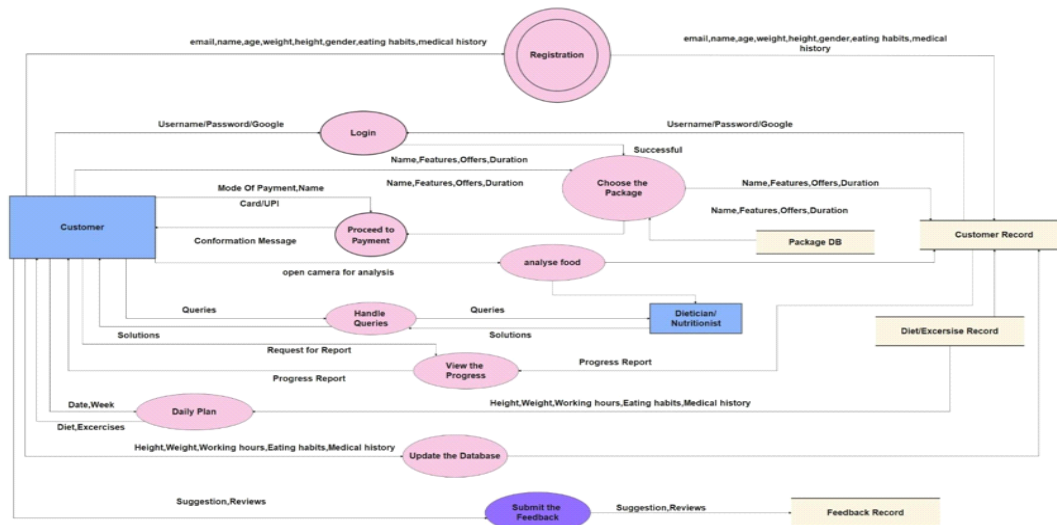

DFD-1(Registration):

DFD-1(Payment):

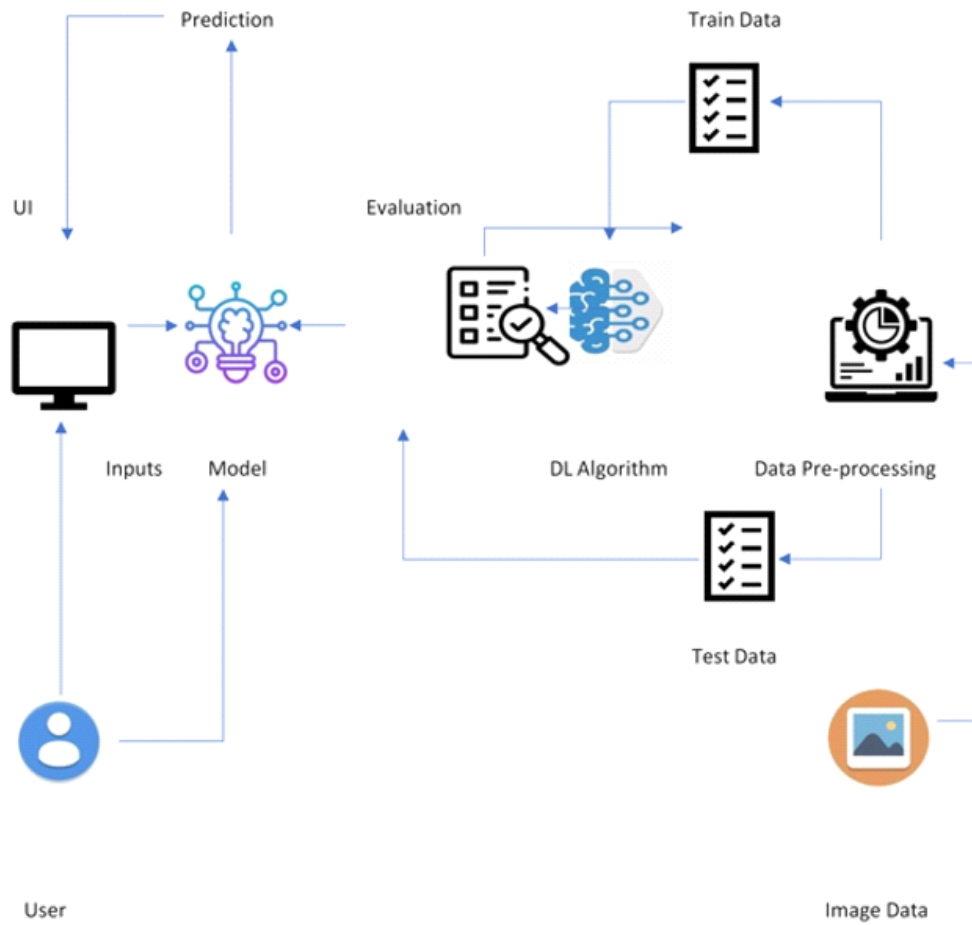

DFD-0:

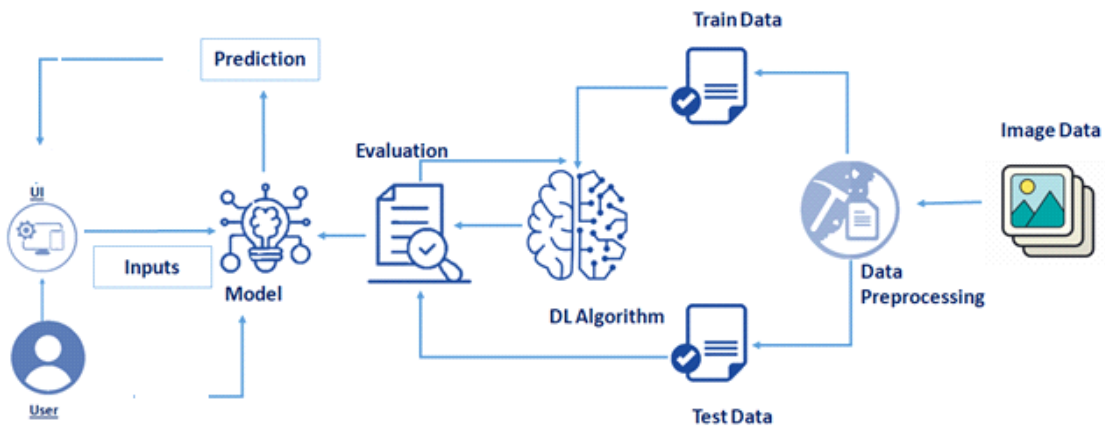

5.2 SOLUTION AND TECHNICAL ARCHITECTURE

SOLUTION ARCHITECTURE:

TECHNICAL ARCHITECTURE :

5.3 USER STORIES

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
		USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
		USN-3	As a user, I can register for the application through Google	I can register & access the dashboard with Facebook Login	Low	Sprint-2
		USN-4	As a user, I can register for the application through Microsoft	I can access the Dashboard with Microsoft.	Medium	Sprint-1
	Login	USN-5	As a user, I can log into the application by entering email & password	I can login the Application by entering password	High	Sprint-1
	Main Interface	USN-6	As a user I can view my calorie intake by clicking photo of the food I eat	Access the proper information about the nutrition and the calorie intake	High	Sprint-2
	Package DB, Dashboard	USN-7	As a user I can choose variety of packages based on my requirement	Selecting an appropriate package	Medium	Sprint-2
Customer Care Executive	Feedbacks DB , Tollfree number, chat bot	USN-8	As a customer care executive, I collect feedbacks from customers	Maintaining proper environment for the customers	High	Sprint-2
Dietitian	Customer Record	USN-9	As a dietitian I provide daily plans for the betterment of the user	Positive results from user	High	Sprint-2
Administrator	Dashboard	USN-10	As an administrator I take care of all the operations which takes place in the app	Zero issues from the user	High	Sprint-2

6. PROJECT PLANNING AND SHEDULING

6.2 SPRINT DELIVERY SHEDULE

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	6 Days	24 Oct 2022	29 Oct 2022	20	31 Oct 2022
Sprint-2	20	6 Days	31 Oct 2022	05 Nov 2022	20	07 Nov 2022
Sprint-3	20	6 Days	07 Nov 2022	12 Nov 2022	15	14 Nov 2022
Sprint-4	20	6 Days	14 Nov 2022	19 Nov 2022	25	19 Nov 2022

VELOCITY CHART

7. CODING AND SOLUTIONING

7.1 FEATURE 1

If you are using anaconda navigator, follow the below steps to download the required packages:

- 1) Open anaconda prompt as administrator
- 2) Type "pip install tensorflow==1.14.0" and click enter.
- 3) Type "pip install keras==2.2.4" and click enter
- 4) Type "pip install open cv-python and click enter
- 5) Type "pip install flask" and click enter

Data Collection

Download the dataset [here](#)

```
[ ] from google.colab import drive
    drive.mount('/content/drive')

Mounted at /content/drive

[ ] cd/content/drive/MyDrive/Colab Notebooks

/content/drive/MyDrive/Colab Notebooks

[ ] # Unzipping the dataset
    !unzip 'Dataset.zip'
```

Image Preprocessing

```
[ ] from keras.preprocessing.image import ImageDataGenerator
```

Image Data Augmentation

```
[ ] train_datagen = ImageDataGenerator(rescale=1./255, shear_range=0.2, zoom_range=0.2, horizontal_flip=True)
    test_datagen = ImageDataGenerator(rescale=1./255)
```

Applying Image DataGenerator Functionality To Trainset And Testset

```
x_train = train_datagen.flow_from_directory(
    r'/content/drive/MyDrive/Colab Notebooks/Dataset/TRAIN_SET',
    target_size=(64, 64), batch_size=5, color_mode='rgb', class_mode='sparse')
x_test = test_datagen.flow_from_directory(
    r'/content/drive/MyDrive/Colab Notebooks/Dataset/TEST_SET',
    target_size=(64, 64), batch_size=5, color_mode='rgb', class_mode='sparse')
```

3. Adding CNN Layers

```
[ ] classifier = Sequential()
    classifier.add(Conv2D(32, (3, 3), input_shape=(64, 64, 3), activation='relu'))
    classifier.add(MaxPooling2D(pool_size=(2, 2)))
    classifier.add(Conv2D(32, (3, 3), activation='relu'))
    classifier.add(MaxPooling2D(pool_size=(2, 2)))
    classifier.add(Flatten())
```

4. Adding Dense Layers

```
[ ] classifier.add(Dense(units=128, activation='relu'))
    classifier.add(Dense(units=5, activation='softmax'))
```

```
classifier.summary()
```

Model: "sequential_1"

Layer (type)	Output Shape	Param #
conv2d (Conv2D)	(None, 62, 62, 32)	896

5. Configure The Learning Process

```
[ ] classifier.compile(optimizer='adam', loss='sparse_categorical_crossentropy', metrics=['accuracy'])
```

6. Train The Model

```
[ ] classifier.fit_generator(generator=x_train, steps_per_epoch = len(x_train), epochs=20, validation_data=x_test, validation_steps = len(x_test))

/usr/local/lib/python3.7/dist-packages/ipykernel_launcher.py:2: UserWarning: 'Model.fit_generator' is deprecated and will be removed in a future version. P1
Epoch 1/20
494/824 [=====] - ETA: 6:52 - loss: 0.7194 - accuracy: 0.7174
```

7. Saving The Model

```
[ ] classifier.save('nutrition.h5')
```

7.2 FEATURE 2

8. TESTING

8.1 TEST CASES

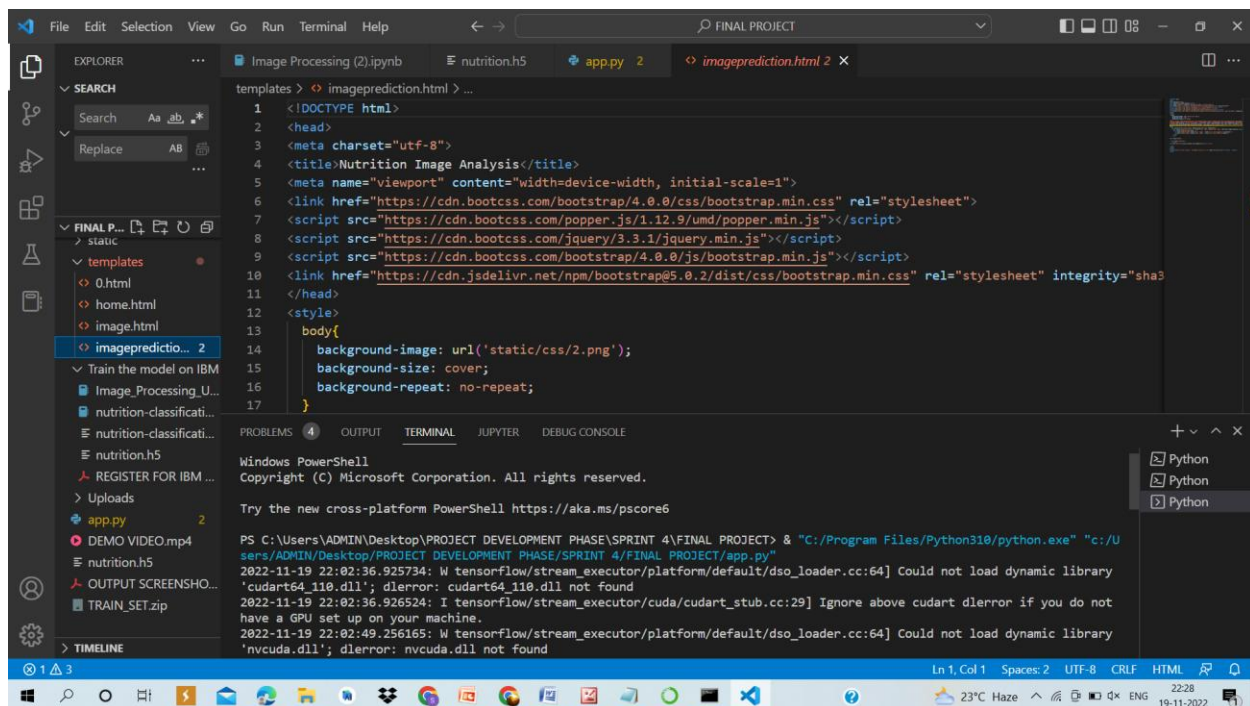

8.2 USER ACCEPTANCE TESTING

We are performing White Box Testing for select the package module.

➤ PSEUDOCODE FOR SELECT THE PACKAGE MODULE

- 1) Select the package and procedure begins.
- 2) READ the package name, features, offers and duration from the packages data base
- 3) Display the package name, features, offers and duration
- 4) Get the package name features, offers, and duration
- 5) Store the package selected to the customers database
- 6) Proceed to payment screen and other module
- 7) WHILE select package is NULL
- 8) END DO...WHILE
- 9) Procedure Ends

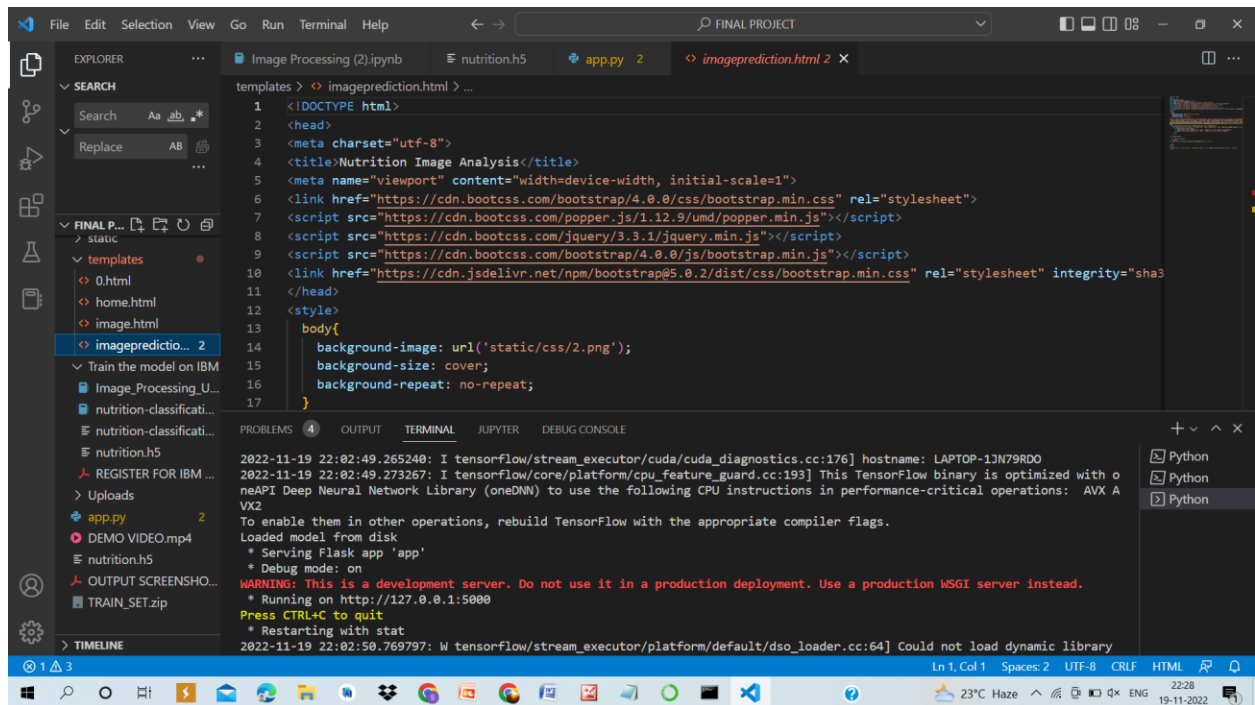

The screenshot shows a Visual Studio Code editor with a file named 'imageprediction.html' open. The file contains HTML code for a 'Nutrition Image Analysis' page. The code includes a head section with a title, viewport meta tag, and links to Bootstrap CSS and jQuery. The body section contains a style block for background image and size. The terminal window at the bottom shows a Windows PowerShell prompt with a command to run a Python script. The command output shows several error messages related to missing dynamic libraries (d3d11.dll, d3dx9_43.dll, d3dx9_46.dll) and a CUDA error (CUDA_ERROR_INVALID_DEVICE). The status bar at the bottom indicates the file is at line 1, column 1, with 2 spaces, in UTF-8 encoding, with CRLF line endings, and the HTML file type.

9. RESULTS

The AI-POWERED NUTRITION ANALYZER FOR FITNESS ENTHUSIASTS is runned successfully.

10. ADVANTAGES AND DIS ADVANTAGES

ADVANTAGES

- Significant level of accuracy in detecting details.
- Provides a user-friendly interface

DISADVANTAGES

- Couldn't keep track of the calorie intake into the body.
- Limited fruit classification.

11. CONCLUSION

Engaging in regular physical activity may produce improvements in an individual physical health, cognitive performance, and psychological well-being. Physical benefits include, but are not limited to, reduced risk for diseases, and improvements in physical functioning, fitness, and overall quality of life.

The purpose of a fitness app is to provide the user with instructions and examples of one or more types of exercise physical activity and nutritional programs.

12. FUTURE SCOPE

- Offers payment convenience in personal training subscriptions.
- Useful articles
- Video instructions
- Diet plans
- Individual Progress Tracking
- Live video From Training sessions
